

Dear Verasonics Customer,

We are happy to announce the next Vantage System Training Class and would like to invite you and/or your colleagues to join us for this event. Due to the current COVID-19 crisis, class will take place remotely via live webex presentations on June 1-4, or June 22-25, 2020. These webinars will consist of 2 hours of training per day for 4 days.

Vantage System Training is intended primarily for new users, to help you become familiar with system programming and trouble-shooting, and to provide a comprehensive overview so you can get the most from your Vantage system. It is also beneficial for experienced customers who wish to enhance their understanding of the software interface and script development. We will introduce users to the many tool kits and example scripts provided in the Vantage software. Additional time will be available to address your technical challenges and provide assistance with custom applications.

There is no cost to Verasonics customers who own systems that are covered under warranty or Service Level Agreement/Extended Warranty. When you confirm your attendance, we will send you information about the confirmed times, the training program, and required preparation for the class.

Please respond at your earliest convenience by email to sarashager@verasonics.com and tell us which session and how many people from your lab will attend.

We look forward to meeting with you soon.

Best regards,

Lauren Pflugrath, CEO
